

THEORETICAL STANCE

relational-distributed
(AI as co-actant)

instrumental-mediational
(AI as tool)

Uncritical entanglement

Distributed authorship
accepted without
reflection.

*Risk: diffuse agency,
cognitive surrogacy*

Critical co-authorship

Distributed stance made
an object of reflection.

*Builds critical AI / postdigital
literacy (Burriss & Leander, 2024;
Jeon & Lee, 2026)*

Substitution

AI delegated text / draft
production; minimal
student judgement.

*Risk: ownership erosion,
“metacognitive laziness”
(Fan et al., 2025)*

Scaffolded tool use

AI at ideation / revision;
evaluative scaffolding;
prompt logs, reflection.

*Builds voice + feedback literacy
(Elturki, 2026;
Sperber et al., 2025)*

*low: text-generative locus,
no scaffolding / documentation*

*high: ideation locus, evaluative
scaffolding, visible documentation*
